### **Bradley J. Pecherek of *COLE* Technology Corporation Attends Training in the Republic of South Korea**

**Fort Worth, TX –August 25, 2008** – Lieutenant Commander (LCDR) Bradley J. Pecherek is the Regional Manager (East) for *COLE* Technology Corporation, and is an Officer in the United States Navy Reserve, assigned to Military Sealift Command Expeditionary Port Unit 113 attached to Military Sealift Command, Far East. LCDR Pecherek recently completed his annual training in the Republic of South Korea.

While the Korean conflict ended in 1953, the Korean peninsula remains divided. North Korea remains a Communist entity, while South Korea is a democratic nation. A coalition of U.S. and South Korean troops enforce the peace agreement.

LCDR Pecherek was in charge of his unit personnel and provided training. He was also responsible for liaison with the U.S. Joint Forces Command, Military Sealift Command Far East, and the Republic of Korea's Navy and Army.

"This was my first time to the Republic of South Korea (ROK). I really enjoyed working with the U.S. Joint Forces Command, along with the ROK military. South Korea is a beautiful country with a rich culture. Anyone who wants to visit should."

"Military Sealift Command, Far East, supports more than 40 ships in the Indian Ocean and Western Pacific, including strategic sealift ships, which transport dry cargo and fuel; special mission ships, which perform oceanographic research, submarine surveillance and other unique operations; underway replenishment ships, which deliver fuel and supplies to U.S. Navy combat ships at sea; and prepositioning ships, which carry heavy combat equipment and supplies for the U.S. Marine Corps, U.S. Army and the U.S. Air Force," stated Mr. Edward Baxter in an MSC Far East Public Affairs Press Release.
