CUSTOMER INFORMATION: COLE TECHNOLOGY CORPORATION SERVICES

COLE's Business Improvement efforts are primarily directed in Consulting, Program, and Project Management Support for all phases of Strategic Planning, Resource Management, Secure Facilities Infrastructure oversight, emerging technology Infrastructure and Equipment Identifications, Organizational Requirements Identification, Logistics and Acquisitions Consulting, Threat Analysis and Warning Security Programs, Information Security Management, Enterprise Security Design and Implementation and Inventory Management support.

COLE's services include providing Base Realignment and Closing (BRAC) support with corresponding environmental analysis and contingency planning. We also provide Continuity of Operations Planning (COOP), Emergency Relocations Site (ERS) program development and Configuration Management Planning/Life Cycle Management Planning (LCMP) and include Corresponding Telecom and Computing Technology Infrastructure and Webmaster consulting, Management and Oversight.

COLE provides specialized Information Technology process development and improvement as well as programming in support of our client needs. Additionally, COLE's support includes specialized and general Administrative and Clerical assistance as required.

PROGRAM MANAGEMENT AND PROJECT OVERSIGHT

The Program Management and Project Oversight effort will provide management and oversight of all responsible sites. *COLE* performs program efficiency analysis, recommends and supervises corrective improvements, supervises all phases of business operations including information technology systems operations, procurement and implementation of business solutions that enhance or otherwise improve organizational and operational efficiencies. The efforts include coordination with emerging technology, other programs, personnel, operations and sites to ensure maximum efficiencies and optimum programs/projects execution.

STRATEGIC PLANNING

As a contractor, *COLE* will review all organizational business operations including information technology required for the development and implementation of a strategic plan. This will include a review of requirements for development of policies and procedures and training to implement the strategic intelligence and other programming plans. Additionally this effort is responsible for preparing for all known and anticipated facilities, infrastructure, and equipment contingencies and preparing complex technical program plans and budget requirements for the command or organization. It includes coordinating and developing technical intelligence or organizational budget submissions, evaluating financial trends for the development of intelligence and other programs budgets, researching resource data to identify and resolve complex budget issues and preparing papers, exhibits and briefs.

RESOURCE MANAGEMENT

The *COLE* program will analyze, evaluate, and integrate resource data from multiple sources to assess the relevance of new developments in all phases of programming and budget formulation. This includes maintaining program and budget information, familiarity with the Program Budget Information System Resource Allocation Document (PBIS - RAD) for TIARA resources and Resource Intelligence Management Information System (RIMIS) for NFIP and JMIP funding sources. The effort includes reviews of PBIS and RIMIS for consistency and program planning, preparing and developing briefings including Future Years Defense Plan (FYDP) resources and multi-discipline strategic spending plans for presentation to the Command or organizational leadership and Resource Sponsors. *COLE* will provide strategic planning for the Open Source Intelligence Production Environment (OSIPE) and stores For Official Use Only (FOUO) Data. Additionally these efforts include oversight of an OPSIPE architecture based on Microsoft XP and Citrix XP. Central site and relocations efforts will be based upon Base Realignment and Closing (BRAC) and Continuity of Operations Planning (COOP), program management, for installation of new servers / upgrades and cabling as directed.

SECURE FACILITIES INFRASTRUCTURE CONSULTING AND OVERSIGHT

The contractor will provide management consulting services for specialized security and intelligence, and other facilities. The effort will include development, establishment, and administration of facilities plans as relates to emerging technology, acquisition of intelligence infrastructure and support equipment, and alteration, renovation, and construction of spaces. *COLE* monitors intelligence architecture and emerging technology and provides leadership and guidance to securing state-of-the-art technology for adaptation and use in sensitive compartmented facilities.

THREAT ANALYSIS AND WARNING SECURITY PROGRAMS CONSULTING

As required by the customer, *COLE* will determine the requirements for a comprehensive Strategic Counterterrorism Intelligence Program as part of the Strategic Counterterrorism Plan. This objective is based on DOD Indications and Warning methodology, and includes definition and a formal training process for implementation of a comprehensive intelligence program.

INFORMATION SECURITY MANAGEMENT

The contractor will coordinate with the Information Systems Security Manager (ISSM) to ensure that all command or site infrastructures comply with the Information Assurance Vulnerability Alerts, Bulletins, and Computer Tasking Orders. A familiarity with the Online Compliance Reporting System (OCRS) is required.

ENTERPRISE SECURITY DESIGN CONSULTING AND IMPLEMENTATION

The contractor will maintain the command or site IT infrastructure accreditation documentation and ensure that accreditation considerations are included in all tasks associated with this effort. Inventory Management Support: The contractor shall provide consulting and assistance as necessary in the inventory management of all command or site equipment to ensure inventory balance. If required, the contractor will research IT solutions and provide procurement requests based on that research to the appropriate IT Department Head for approval.

BASE REALIGNMENT AND CLOSURE (BRAC) PLANNING

The Base Realignment and Closure Act of 2005 (BRAC 2005) places all Department Of Defense sites at risk for alignment and/or closure. In order to properly prepare contingency plans for all possible BRAC 2005 alignment and/or closure decisions, the *COLE* Infrastructure and Resources Group has initiated strategic Infrastructure Assessments and Move Plans. These Assessment & Move Plans identify prospective relocation or alignment sites for DOD and federal government sites, and provide input site negotiations once the President approves the BRAC List. This effort provides continuous support throughout the 10-year BRAC business operations cycle.

CONTINUITY OF OPERATIONS PLANNING (COOP) EMERGENCY RELOCATION SITES (ERS)

COLE Technology will consult with and support the site or command infrastructure to define how and where to recover capability when the infrastructure suffers significant failure, natural disaster, or terrorism. The effort includes resource and requirements determination, command program development, training, implementation, and exercises. *COLE* will also address information technology requirements, acquisition, and installations, different problems that can arise in the network, and address means to recover from the problems, particularly backup of data and software.

CONFIGURATION MANAGEMENT PLANNING/LIFE CYCLE MANAGEMENT PLANNING (LCMP)

COLE Technology Corporation will coordinate with command personnel to implement procedures to control and manage system configuration, which is essential to system performance, security, and cost reduction and control. A system life cycle management plan will be maintained in accordance with site or command specifications which will allow the command to budget for software and hardware upgrades, new technologies, training, and IT resource retirement.

TELECOM NETWORK AND COMPUTING SYSTEMS SUPPORT

COLE will respond to the needs of the Active Force providing a virtual and private telecommunications network to access peacetime intelligence collection, analysis, production, and management support as a part of readiness training. Support includes computing systems hardware, infrastructure, updates and maintenance, and training. COLE will represent the command as necessary and specified to ensure effective lines of communication are maintained with the program manager and supporting technical staff.
